#1590

Dear Sir,

About the Killer of Rev. King, I have a theory that no one else seems to have. As you know it seems to be a fact that the car found and the gun had Ray(s finger prints on it. James Earl Ray, seems to be the person thought to have committed this killing. Well I have the belief that his brotherJerry, did this crime. Jerry could have had use of the car and also his brother's gun, he also is the kind of character who would plant a crime on another person, even his own Mother. Could you please look up this Jerry and see what you can come up with?

As to money Jerry could have been sending his brother money to make things look bad for him in just t he way the police are now looking as to the money Ray had been spending when he wasn't working.

How did Jerry get that job at the club? Who recomended him for it? There are lots of questions that wuld be interesting reading about this character. Do you have his fingerprints? Was he ever involved in a killing or sent to prison? Would you say Jerry had underworld connections?

Please forgive me for writing as I am a person who has a hunch about this Jerry being much worse than the brother you think did thekilling. Did he wear contact lenses? He could have worn them to have blue eyes if they were realy black. Look into this fellow.

Rose Fudge
