I was in Memphis, Tenn. the night King was shot. It was a cold, rainy, spring night. Sleet was peppering the windows. I turned on the radio to see what the weather conditions were. Immediately there was a sign of much confusion with many people talking. The voice of an elderly negro woman was saying, "He was shot by his own color". Immediately the radio was shut off the air.

All this occured in a part of Memphis near Beale St. which is largely black population.

None of this has been publicized. Bypass Raul was guilty. Think of the countless ones who have recived convictions and recived light sentences and early paroles!

It is amazing that Ray has been tortured all these years, when he saved the United States - King was a communist belonging to 47 organizations, all

trained in a place near Syracuse, Texas.

There have been shocking murders in the U.S. such as the Son of Sam who admits he murdered people & set many fires — yet he is still alive! Why!

There has been no proof that Ray murdered this man King. It is to be hoped that he will be released at once, and the courts should hang their heads in shame!
