To Lawyer Representing James Earl Ray
or
Coretta Scott King Fax 901-576-3681

I have testimony involving my participation in the Martin Luther King assassination However it was computer controlled. On pages 182 & 183 of the book Mandate in Memphis describes me being by the bushes & shooting a rifle I also had on a mask a thespian mask the woman controlling me on the slot was Katy Goerring who lives here in Newton she yelled to me over the computer not a head shot as I was aiming for the head undoubtably I was a blank shot as he would have been shot in the head. Hall Loren Hall was in the bathroom shooting at him as I trained for that part also as I understand it Stewart Hall and Loren Hall and even some of Lorens Brothers uncles changed places with each other as they looked alike then I've sent letters to Mrs Coretta Scott King telling her of other rehearsels and how he was shot but until I read the book by Mark Lane and Dick Gregory did I know the truth of his life being taken even with the other Rehearsels. I didn't know the final part played in it. Again I must tell you my mind and actions were controlled by several comp-ers and operators The operation was sponsored by the office of Naval Research and AT&T a group of Gov scientists of the CIA of which one was released to Retirement Recently 5 of Len pages in the Book describe our actions up to and during the shooting and also after it.
